

A lot of your clients can be sensitive to fragrances and smells. Being sulfate free and organic is not enough when product companies then use an artificial fragrance or scent.

We only use Pure Essential Oils or we have a totally Fragrance Free version.

ESSENTIAL OILS - are distilled typically by steam or water from the leaves, stems, flowers, bark, roots and other parts of a given plant botanical. Essential Oils contain the true aromatic essence of the plants that they are derived from and offer many other therapeutic benefits that span beyond their pleasant aromas.

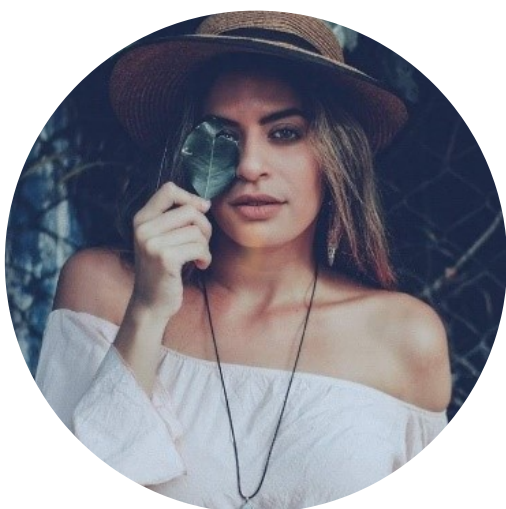

FRAGRANT OILS on the other hand are generally synthetic even though some may still contain some natural compounds.

It is not enough for a product to be sulfate and Paraben Free if they still then use a synthetic fragrance.

Give your clients the best most healthy option when you stock our Ms Maude all Natural hair care range.
